DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 3 - 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,146,491 (Silver et al.).

Silver et al teach a method of processing calls in a communication network where a caller pays for some of the calls, the method comprising; receiving a call in a communication network, determining if the caller is required to pay for the call before implementing services for the call; and if the caller is not required to pay for the call, implementing the services for the call without validating the caller. (See Col. 3, lines 16 - Col 4, line 12). With respect to the validation step, such could be represented at Col. 3, lines 49 - 60. Note with respect to claim 4, that the call is an "800" call (Col. 3, line 18). With respect to claim 6, note Col. 3, lines 4 - 12.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2742

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Silver et al. In view of U.S. Patent No. 5, 163,087 (Kaplan).

Silver et al teach the claimed device except for the AIN aspects of the invention. Kaplan teaches that it is old in the art to have an AIN lookup. It would have been obvious to one of ordinary skill in the art to have incorporated an AIN lookup with the device of Silver et al as such would only entail the substitution of one caller ID device for another.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

U.S. Patent No. 5,592,537 (Moen) - note Figs. and Abstract.
